THE 2026 CYBERSECURITY CRISIS

AUTONOMOUS AI AGENTS ARE ATTACKING PRODUCTION AT MACHINE SPEED.

THE PROBLEM: ASYMMETRIC RECONNAISSANCE

$10.5T THREAT

Autonomous threat actors and rogue LLM agents probe SSH, REST APIs, and MCP endpoints 24/7. Traditional honeypots are static and passive, while human SecOps teams suffer a **4.2-hour average Mean Time to Investigate (MTTI)**.

THE SOLUTION: CLINE SENTINEL

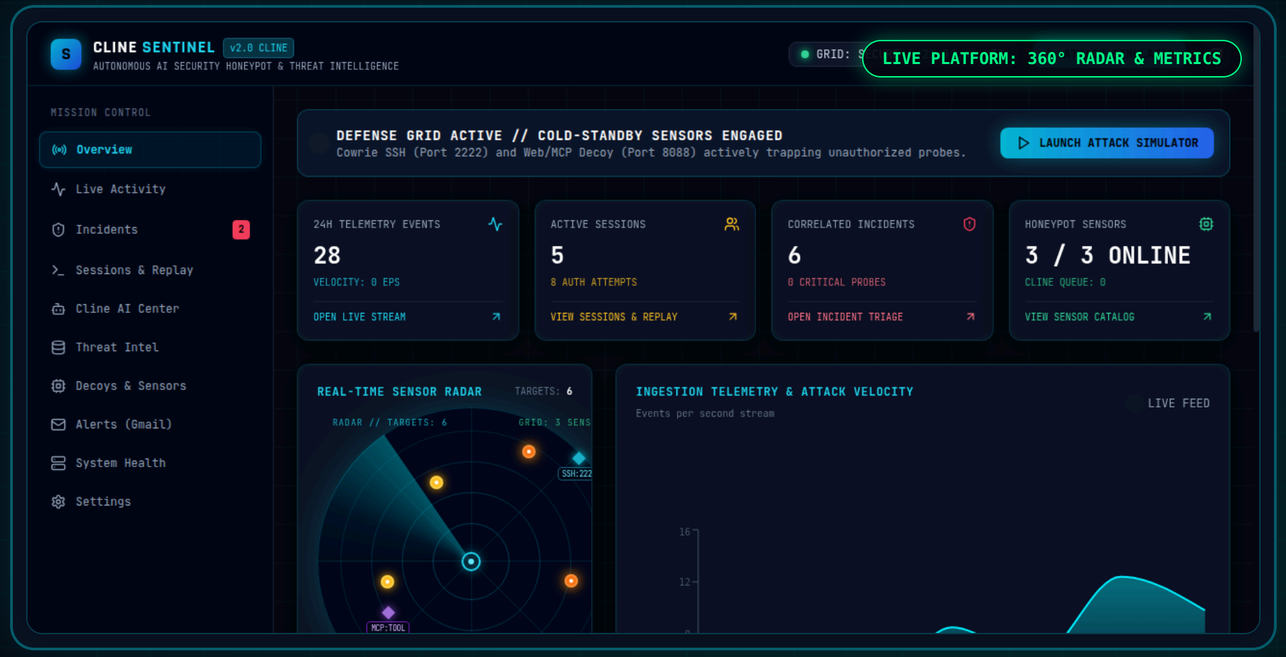

REAL-TIME AI SOC

Deceptive decoy sensors lure adversaries into safe virtual emulators. **Cline AI acts as an unattended Tier-3 Security Analyst**, correlating telemetry, classifying intent, and generating one-click remediation in **under 30 seconds**.

FORENSIC ANALYSIS SLA

3-Tier
RISK & AI SCORING

INTELLIGENCE PIPELINE

FROM DECOY TRAP TO CLINE FORENSIC REMEDIATION.

1 Multi-Surface Decoy Network

Cowrie SSH (Port 2222) and Synthetic Web/MCP Agent decoys (Port 8088) capture credentials, commands, and structured agent discovery probes.

2 Deterministic Correlation Engine

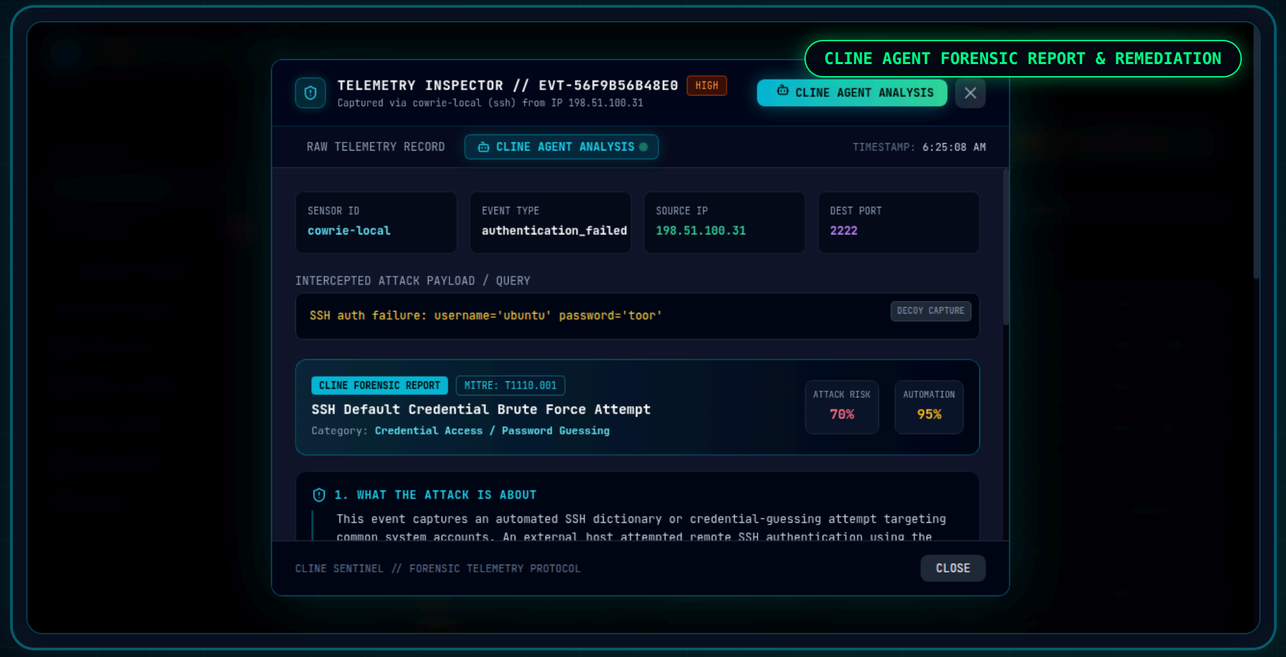

Events are normalized, deduplicated in PostgreSQL 16, and scored across Attack Risk, Automation Likelihood, and AI-Agent Probability.

3 Unattended Cline AI Investigation

Sanitized telemetry is analyzed by Cline CLI in safe plan-mode (-p) with OpenRouter. Zero tool access guarantees prompt-injection safety.

4 Actionable 3-Pillar Security Intelligence

Delivers: (1) What the attack is about, (2) Attacker intent & mechanics, and (3) Actionable remediation checklist with ready-to-copy firewall rules.

ENTERPRISE SOC EXPERIENCE

INTERACTIVE FORENSICS BUILT FOR EXPERT SECOPS.

Functional Radar Sweep
360° SVG radar dynamically plots live attacks with severity color codes and click-to-triage reticle lock-on.

CRT Keystroke Replay
Phosphor terminal player steps through captured attacker commands with 1x, 2x, 5x speed scrubbing.

Attack Simulation Matrix
1-click test range triggering SSH brute-force, web admin leaks, MCP agent probes, and command injections.

Parallel.ai & Composio
MITRE ATT&CK technique catalog and multi-tier Gmail escalation SLAs (Immediate, Hourly, Daily).

JOIN THE DEFENSE GRID
Fully containerized, production-hardened, and verified live on modern infrastructure. Explore the open-source code and run the platform in under 2 minutes.
